

Fine Weather

By: Peter Queal

It's fine, fine weather, beautiful to walk around  
I'll find myself a simple place  
where nature sings her subtle sound  
Every time I feel this way  
I learn some more about myself  
The solitary's good for me  
When I put the rat-race on the shelf

I'm gonna spread it everywhere  
the earth gives of itself to share  
in this world each place I go  
I'll sing these words to let you know  
You've got to let your feelings show  
You've got to let your feelings show

I'm gonna take the time and go  
See the splendid show  
I'll take the time to go  
And step by step I'll take myself  
as far as I can see  
Beyond this pre-fabricated world  
Get myself a little free  
I'll close my eyes and fantasize  
What if we all felt this way

Next time will you come with me  
We'll dance into eternity  
Sharing what belongs to all  
Hearing nature's beacon call  
Mountains, sky and sea alive  
See to it that they survive  
Get that righteous feel unfurled  
People choose to love the world  
We've got to let the madness go  
We've got to let the madness go

Now, get into the flow  
Take a little time to know how to  
Get into the flow  
And step by step you'll take yourself  
as far as you can go  
Beyond this pre-fabricated world  
Get yourself a little soul  
Close your eyes and fantasize  
What if we all felt this way
