

## I Need You

By: Peter Queal

I need you like I need rain  
and rain, it falls, and then it flows  
away just like my lover goes

If you know just what will be,  
A vision you could share with me  
Your crystal ball could help me see

Why love is here and then it's gone,  
I feel so real and then so wrong  
Your tempting lips could sink big ships,  
this captain's 'bout to drown

I love anyway, will love anyway, have loved every way.  
I love anyway, will love anyway, have loved every way.

Tell you what, I'll sing new lines  
of sparkling smiles and super times  
The deepest love is still to come

It's hard to think our thing is done  
I really feel you're still the one so  
Touch and go some time will show if

Hearts are hi or hearts are low,  
Just one more kiss before I go  
I'll close my eyes and rest my soul  
This burning urge I can't control

I love anyway, will love anyway, have loved every way.  
I love anyway, will love anyway, have loved every way.

I need you like I need rain  
and rain, it comes,  
and then it goes  
away just like the crystal shows,  
whoa...
